

ABLOY[®] PROTEC²

Double-checked access control
for water industry

BASED ON MECHANICAL AND ELECTRONIC IDENTIFICATION, **ABLOY[®] PROTEC² CLIQ** IS AN EASY-TO-USE AND FLEXIBLE ACCESS CONTROL SYSTEM. ITS DOUBLE TECHNOLOGY MEANS THAT THE SAFETY AND SECURITY OF YOUR BUSINESS IS DOUBLE-CHECKED.

TYPICAL CHALLENGES OF ACCESS CONTROL

Reservoirs and water tanks, water treatment plants, pumping sites and distribution networks are vulnerable and often located in remote areas that are difficult to control – making it hard to protect sites from vandalism and theft. You probably can't add all the locations to your existing system and can't see which padlocks and cylinders have been opened – when and by whom. Key management takes time and the operating environment is challenging for the locking system. Additionally, the budget allocated to access control is limited.

ABLOY® PROTEC² CLIQ SOLUTION

ABLOY® PROTEC² CLIQ padlocks or cylinders can be installed to all locations.

Comprehensive range of products includes padlocks, door cylinders, cam locks, cabinet locks and key deposits.

The system can be operated remotely.

Access rights are managed remotely with **ABLOY® CLIQ Web Manager**.

User downloads the access rights by using a wall unit or a mobile unit

Flexibly updatable access rights based on time and date are stored in the key. User needs only one key!

BENEFITS

- Patented weatherproof protection that meets the standards
- Supreme keying possibilities and a comprehensive range of cylinders and padlocks
- Time-based access rights are easy to update remotely
- Thanks to audit trail, you know who has accessed the location
- All locks can be opened with one key
- Easy to expand and update
- Worldwide support
